*Migratory Bird  
Conservation Commission*

# The Migratory Bird Conservation Commission

Section 2 of the Migratory Bird Conservation Act of February 18, 1929 (Act), as amended, established the Migratory Bird Conservation Commission.

Section 2. A Commission to be known as the Migratory Bird Conservation Commission, consisting of the Secretary of the Interior, as Chairman; the Administrator of the Environmental Protection Agency; the Secretary of Agriculture; two Members of the Senate, to be selected by the President of the Senate; and two Members of the House of Representatives, to be selected by the Speaker, is created and authorized to consider and pass upon any area of land, water, or land and water that may be recommended by the Secretary of the Interior for purchase or rental under this Act and to fix the price or prices at which such area may be purchased or rented; and no purchase or rental shall be made of any such area until it has been duly approved for purchase or rental by said Commission.

Any Member of the House of Representatives who is a member of the Commission, if reelected to the succeeding Congress, may serve on the Commission notwithstanding the expiration of a Congress. Any vacancy on the Commission shall be filled in the same manner as the original appointment. The ranking officer of the branch or department of a State to which is committed the administration of its game laws, or his authorized representative, shall be a member ex officio of said Commission for the purpose of considering and voting on all questions relating to the acquisition, under said sections, of areas in his State. For purposes of said sections, the purchase or rental of any area of land, water, or land and water includes the purchase or rental of any interest in any such area of land, water, or land and water.

## Membership

Hon. Gale Norton  
*Secretary of the Interior; Chairman*

Hon. Ann M. Veneman  
*Secretary of Agriculture*

Hon. Christine Todd-Whitman  
*Administrator, Environmental Protection Agency*

Hon. John B. Breaux  
*Senator from Louisiana*

Hon. Thad Cochran

# Approvals During Fiscal Year 2003

In Fiscal Year 2003, the Migratory Bird Conservation Commission approved the acquisition boundary at two national wildlife refuges. The first refuge, totaling 11,382 acres, is the Sunkhaze Meadows National Wildlife Refuge in Penobscot County, Maine. It was established in 1988, with the approval for the acquisition of 9,500 acres. The second refuge, totaling 12,827 acres, is the Detroit River International Wildlife Refuge in Wayne and Monroe Counties, Michigan. It is authorized by Public Law 107-91 and was established on December 21, 2001. The Commission approved boundary additions, totaling 15,959 acres, to nine refuges that were previously approved by the Commission. The Commission also approved the purchase price of 11,953 acres at 17 refuges and reapproved the price for fee lands at two refuges and one lease at one refuge totaling 3,518 acres.

# The Migratory Bird Conservation Fund

The Migratory Bird Conservation Fund provides the Department of the Interior with monies to acquire migratory bird habitat. There are four major sources of money for the Fund. The most well-known source is the revenue received from the sale of Migratory Bird Hunting and Conservation Stamps, commonly known as Duck Stamps, as provided for under the Migratory Bird Hunting and Conservation Stamp Act of March 18, 1934, as amended. The other three major sources include appropriations authorized by the Wetlands Loan Act of October 4, 1961, as amended; import duties collected on arms and ammunition; and receipts from the sale of refuge admission permits as provided for in the Emergency Wetlands Resources Act of 1986. The Fund is further supplemented by receipts from the sale of products from refuge lands and rights-of-ways across national wildlife refuges, the disposal of refuge lands, and reverted Federal Aid funds.

Two land acquisition programs are financed from the Migratory Bird Conservation Fund. The first purchases major areas for migratory birds under the authority of the Migratory Bird Conservation Act. Lands acquired through this program are considered

and approved by the Migratory Bird Conservation Commission. The second program acquires small natural wetlands and associated uplands located mainly in the Prairie Pothole Region of the upper Midwest. These lands, known as Waterfowl Production Areas, are acquired under the authority of the Migratory Bird Hunting and Conservation Stamp Act and do not require approval from the Commission.

During Fiscal Year 2003, the Department of the Interior obligated a total of \$23,602,904 for the acquisition of land and interests in land totaling 25,777 acres in major migratory bird conservation areas. An additional \$12,428,865 was obligated for projects in Waterfowl Production Areas totaling 41,258 acres.

A total of \$44,642,578 was available for obligation from the Migratory Bird Conservation Fund during Fiscal Year 2003. Obligations for all Migratory Bird Conservation Fund land acquisition functions during the fiscal year totaled \$42,217,437 (\$515,092 of which were from prior year recoveries). The total obligations equal 95 percent of the available funds.

# New National Wildlife Refuge Boundary Approvals

In Fiscal Year 2003, the Migratory Bird Conservation Commission approved the acquisition boundary of two new refuges, Sunkhaze Meadows National Wildlife Refuge in Penobscot County, Maine and Detroit River International Wildlife Refuge in Wayne and Monroe Counties, Michigan. The Commission also approved the acquisition boundary of nine national wildlife refuges that were previously established: Alamosa National Wildlife Refuge in Alamosa County, Colorado; Grays Lake National Wildlife Refuge in Bonneville County,

Idaho; Moosehorn National Wildlife Refuge in Washington County, Maine; Blackwater National Wildlife Refuge in Dorchester County, Maryland; Cape May National Wildlife Refuge in Cape May County, New Jersey; San Bernard National Wildlife Refuge in Brazoria County, Texas; Trinity River National Wildlife Refuge in Liberty County, Texas; Turnbull National Wildlife Refuge in Spokane County, Washington; and, Horicon National Wildlife Refuge in Dodge County, Wisconsin.

**New National Wildlife  
Refuge Boundary Approvals (Cont.)**

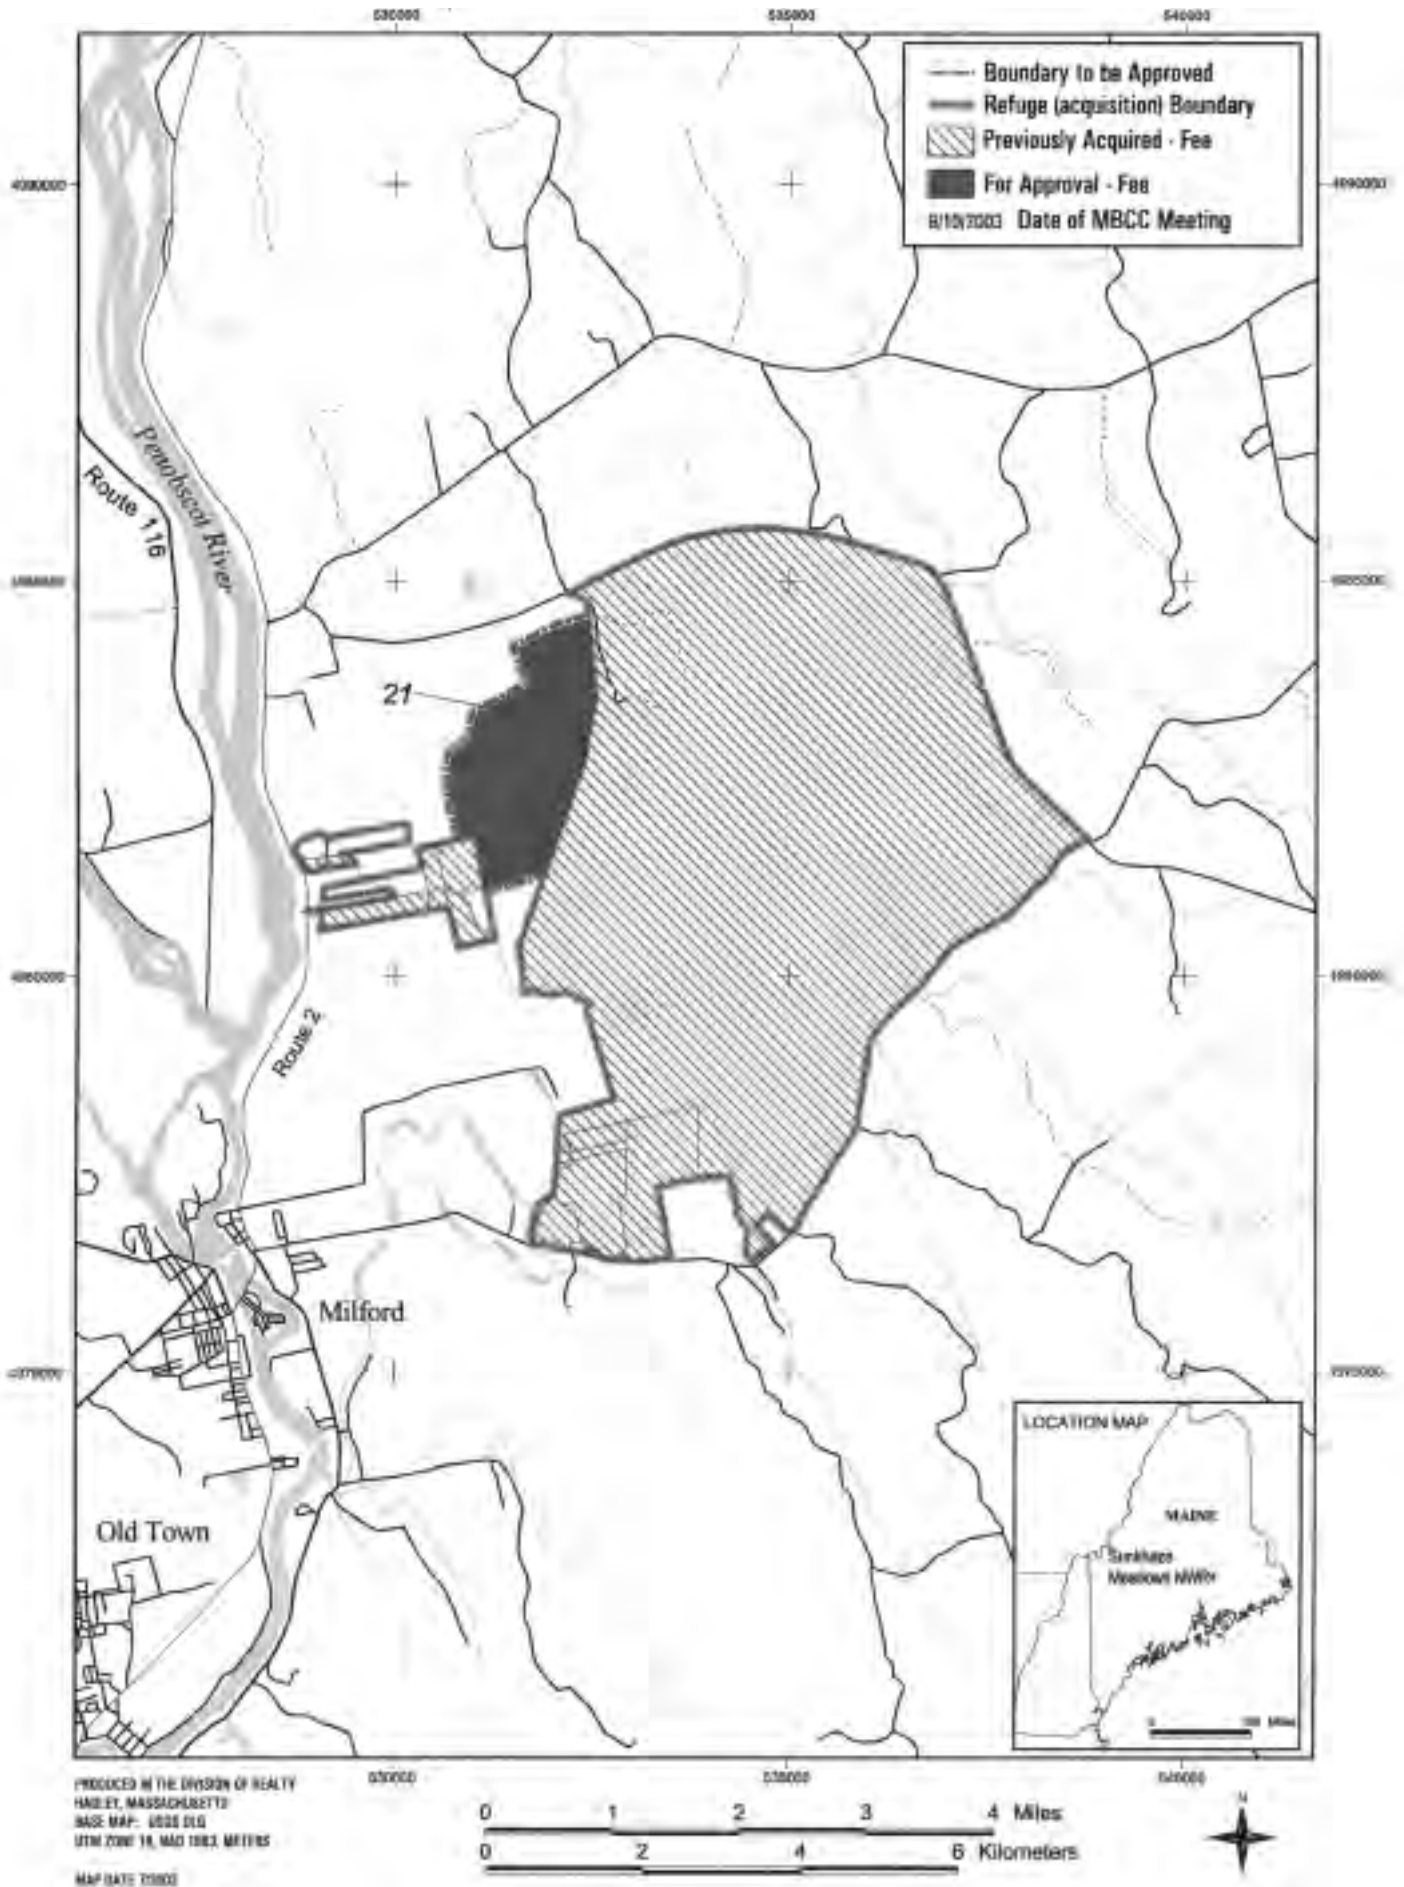

**Sunkhaze Meadows  
National Wildlife Refuge**  
*Penobscot County, Maine*

Sunkhaze Meadows National Wildlife Refuge was established in 1988. Approval was given for the acquisition of 9,500 acres. Subsequent expansions have raised the number of acres to be acquired to 11,382. The refuge is located in southeast Maine and straddles the Sunkhaze Stream that enters the Penobscot River just north of Old Town, Maine. This is about 10-15 miles north of Bangor, Maine.

Sunkhaze Meadows NWR will provide the necessary breeding habitat, food, cover, and travel corridors for the species of waterfowl that utilize the Atlantic Flyway. The area is ranked high regionally under the North American Waterfowl Management Program due to the black duck, and is also listed as a high-priority acquisition under the Category 20 Plan. The habitat is a wetland complex consisting primarily of wet meadows, shrub thickets, wooded swamps, open riverine habitat, and plant communities associated with peatlands such as shrub heaths and wooded cedar and spruce bogs. Over 145 species of birds have been recorded on the refuge, 85% of which nested in the area.

The Commission approved the 11,382 acre refuge boundary and the price approval for a 951 acre tract on September 10, 2003.

**Sunkhaze Meadows National Wildlife Refuge**  
*Penobscot County, Maine*

**New National Wildlife  
Refuge Boundary Approvals (Cont.)**

**Detroit River International Wildlife Refuge**  
*Wayne and Monroe Counties, Michigan*

Detroit River International Wildlife Refuge was established by Public Law 107-91 on December 21, 2001. Lands were subsequently added through donations, withdrawn from public domain, and purchases. The refuge is located on the southeastern side of Michigan in Wayne and Monroe Counties. Lands formerly managed by the Service as Wyandotte National Wildlife Refuge were re-designated as part of the Refuge. The refuge includes islands, coastal wetlands, marshes, shoals, and river front lands along 18 miles of the Lower Detroit River from Zug Island south along western Lake Erie to the southern boundary of Sterling State Park.

Detroit River IWR is the first international refuge in North America and will conserve, protect, and restore habitat for 29 species of waterfowl, 65 kinds of fish, and 300 species of migratory birds on more than 5,000 acres along the lower Detroit River in Michigan and Canada. The refuge is an important waterfowl migration corridor. Three million ducks, geese, swans, and coots migrate annually through the Great Lakes region. 300 species of birds have been documented in the Detroit-Windsor area, of which approximately 150 species breed in the immediate area. Some 300,000 diving ducks stop in the Lower Detroit River on their fall migration from Canada to the east and south each year to rest and feed in beds of water celery found in the region. The corridor is recognized in the Canada-United States North American Waterfowl Management Plan that has identified the Detroit River as part of one of 34 Waterfowl Habitat Areas of Major Concern in the United States and Canada.

The Commission approved the refuge boundary and price approval for a 153 acre tract on June 25, 2003.

**Detroit River International Wildlife Refuge**  
*Wayne and Monroe Counties, Michigan*

**New National Wildlife  
Refuge Boundary Approvals (Cont.)**

**Alamosa National Wildlife Refuge**

*Alamosa County, Colorado*

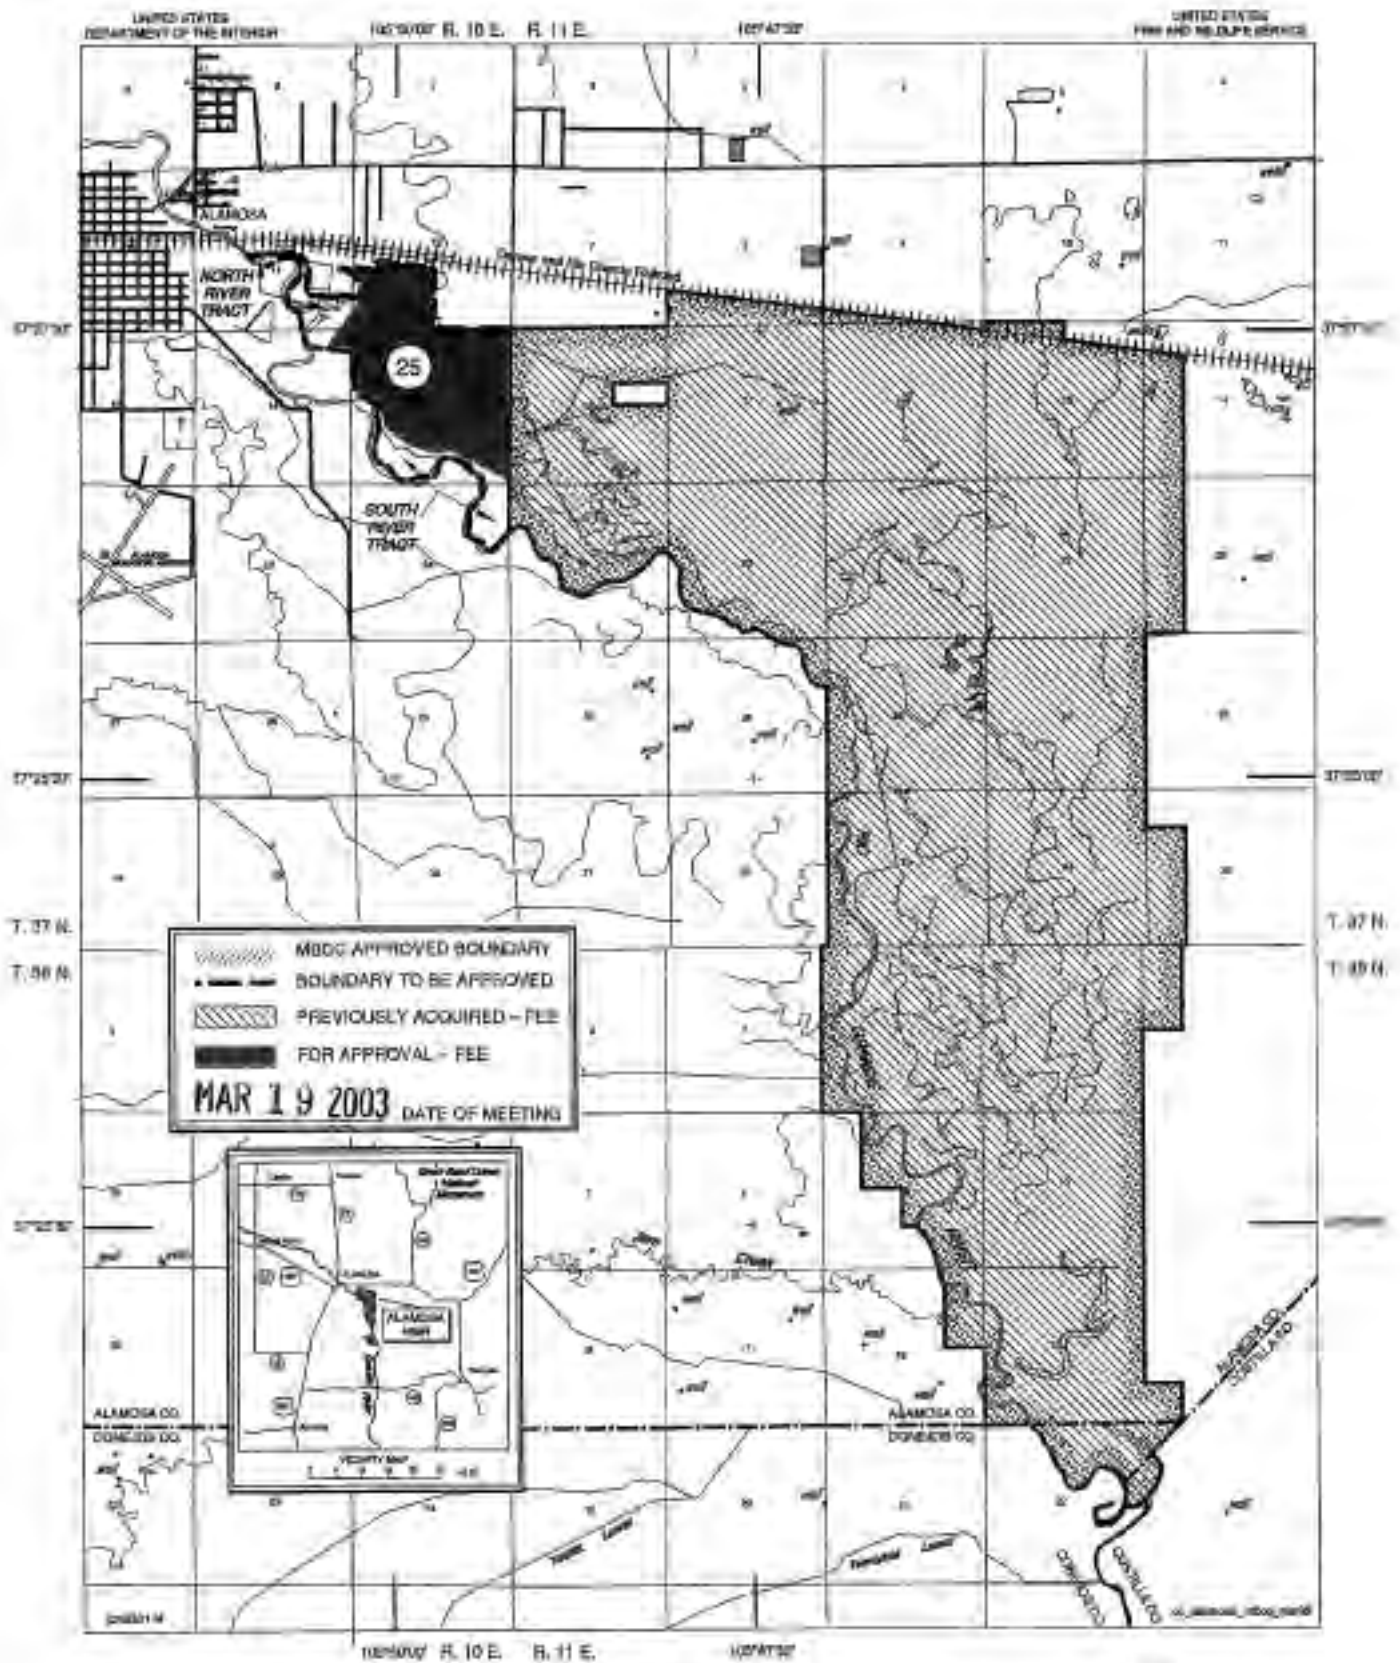

Alamosa National Wildlife Refuge was established on June 27, 1962. The refuge is located along the Rio Grande River in the San Luis Valley, approximately 3 miles southeast of Alamosa, Colorado. Lands have been transferred from the Bureau of Reclamation, withdrawn from public domain, and purchased.

This valley is important for its valuable waterfowl migration and breeding area. The addition includes the associated water rights adjacent to the refuge and will enable the refuge staff to meet the Refuge's mission by enhancing resources for migratory bird production during critical portions of their life cycle. Habitat consists primarily of a mixture of temporary, seasonal, and semi-permanent wetlands interspersed with desert-shrub plant communities. Wetlands are maintained through irrigation practices. The diverse habitat will provide outstanding nesting cover for many species including mallards, cinnamon teal, gadwall, Canada geese, and several species of waterfowl, along with shorebirds such as Wilson's phalaropes, black necked stilts, and American avocets. This refuge provides resting, roosting, and feeding areas for migrants.

The Commission approved the 857 acre refuge boundary addition and price approval for a 638 acre tract on March 19, 2003.

**Alamosa National Wildlife Refuge**  
*Alamosa County, Colorado*

**New National Wildlife  
Refuge Boundary Approvals (Cont.)**

**Grays Lake National Wildlife Refuge**  
*Bonneville County, Idaho*

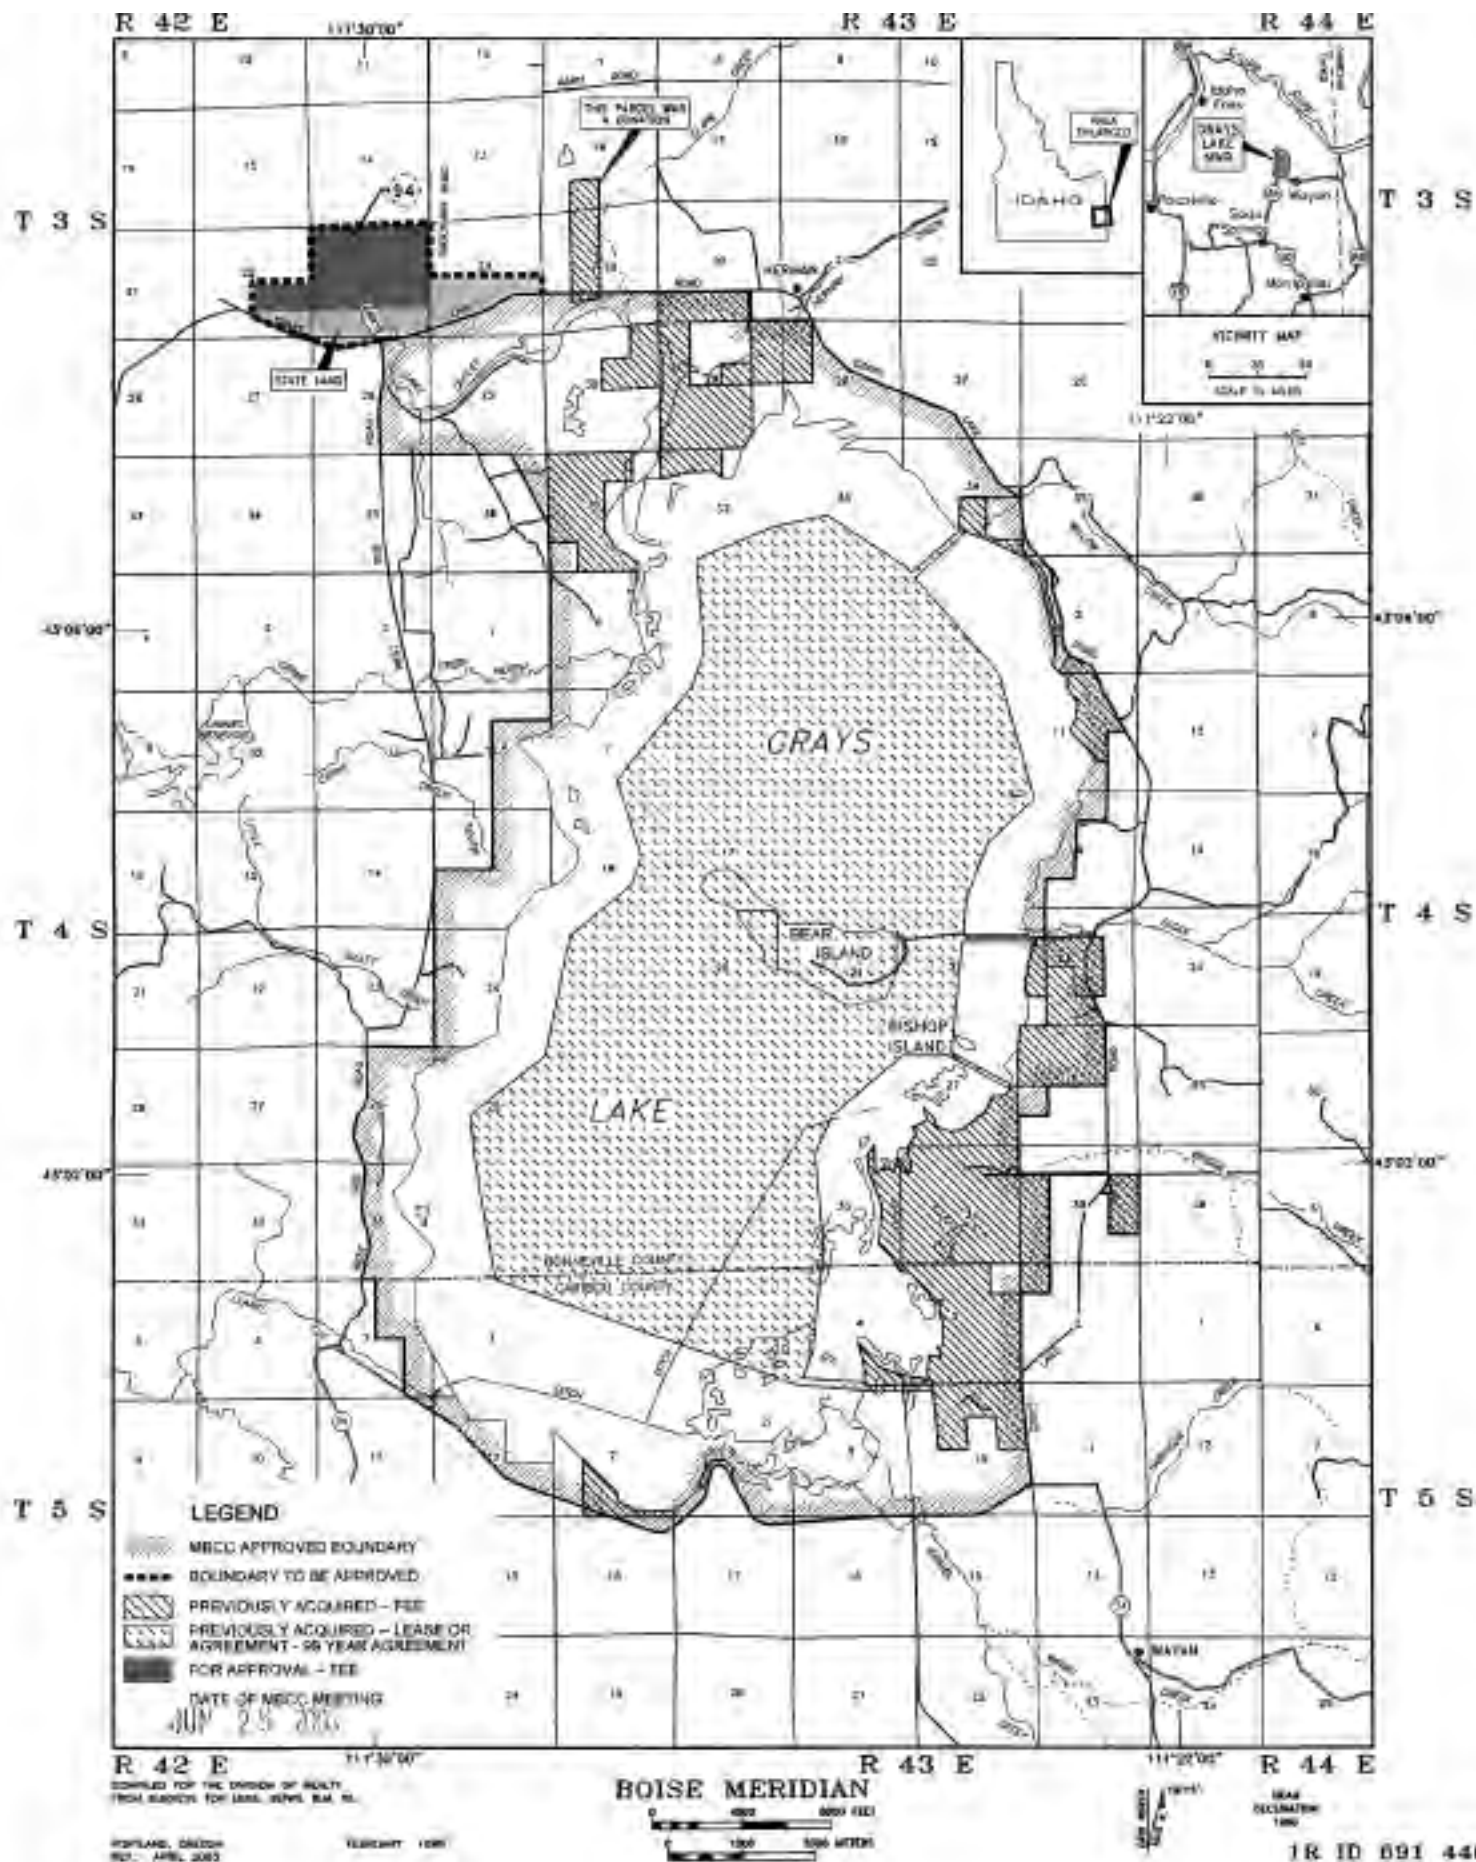

On June 15, 1965, the Migratory Bird Conservation Commission approved the refuge through the approval of a 99 year agreement that gave the Service management control of approximately 13,000 acres of lake bed area within Grays Lake, near Wayin, Idaho in Bonneville and Caribou Counties in southeast Idaho. The Service sought to enlarge the boundary of the refuge to improve management capabilities which was approved on May 9, 1972 by the Commission.

The current boundary of the refuge is dedicated to providing high quality nesting, feeding, and migration habitat, and to maintain natural ecological diversity for migratory waterfowl and other related species. The purchase of this tract and the inclusion of state land under a cooperative agreement will allow the further enhancement of waterfowl habitat and increased nesting by a variety of waterfowl, including the trumpeter swan, Canada goose, canvasback, redhead, mallard, and northern pintail.

The Commission approved the 760 acre refuge boundary addition and price approval for a 560 acre tract on June 25, 2003.

**Grays Lake National Wildlife Refuge**  
*Bonneville County, Idaho*

**New National Wildlife  
Refuge Boundary Approvals (Cont.)**

**Moosehorn National Wildlife Refuge**

*Washington County, Maine*

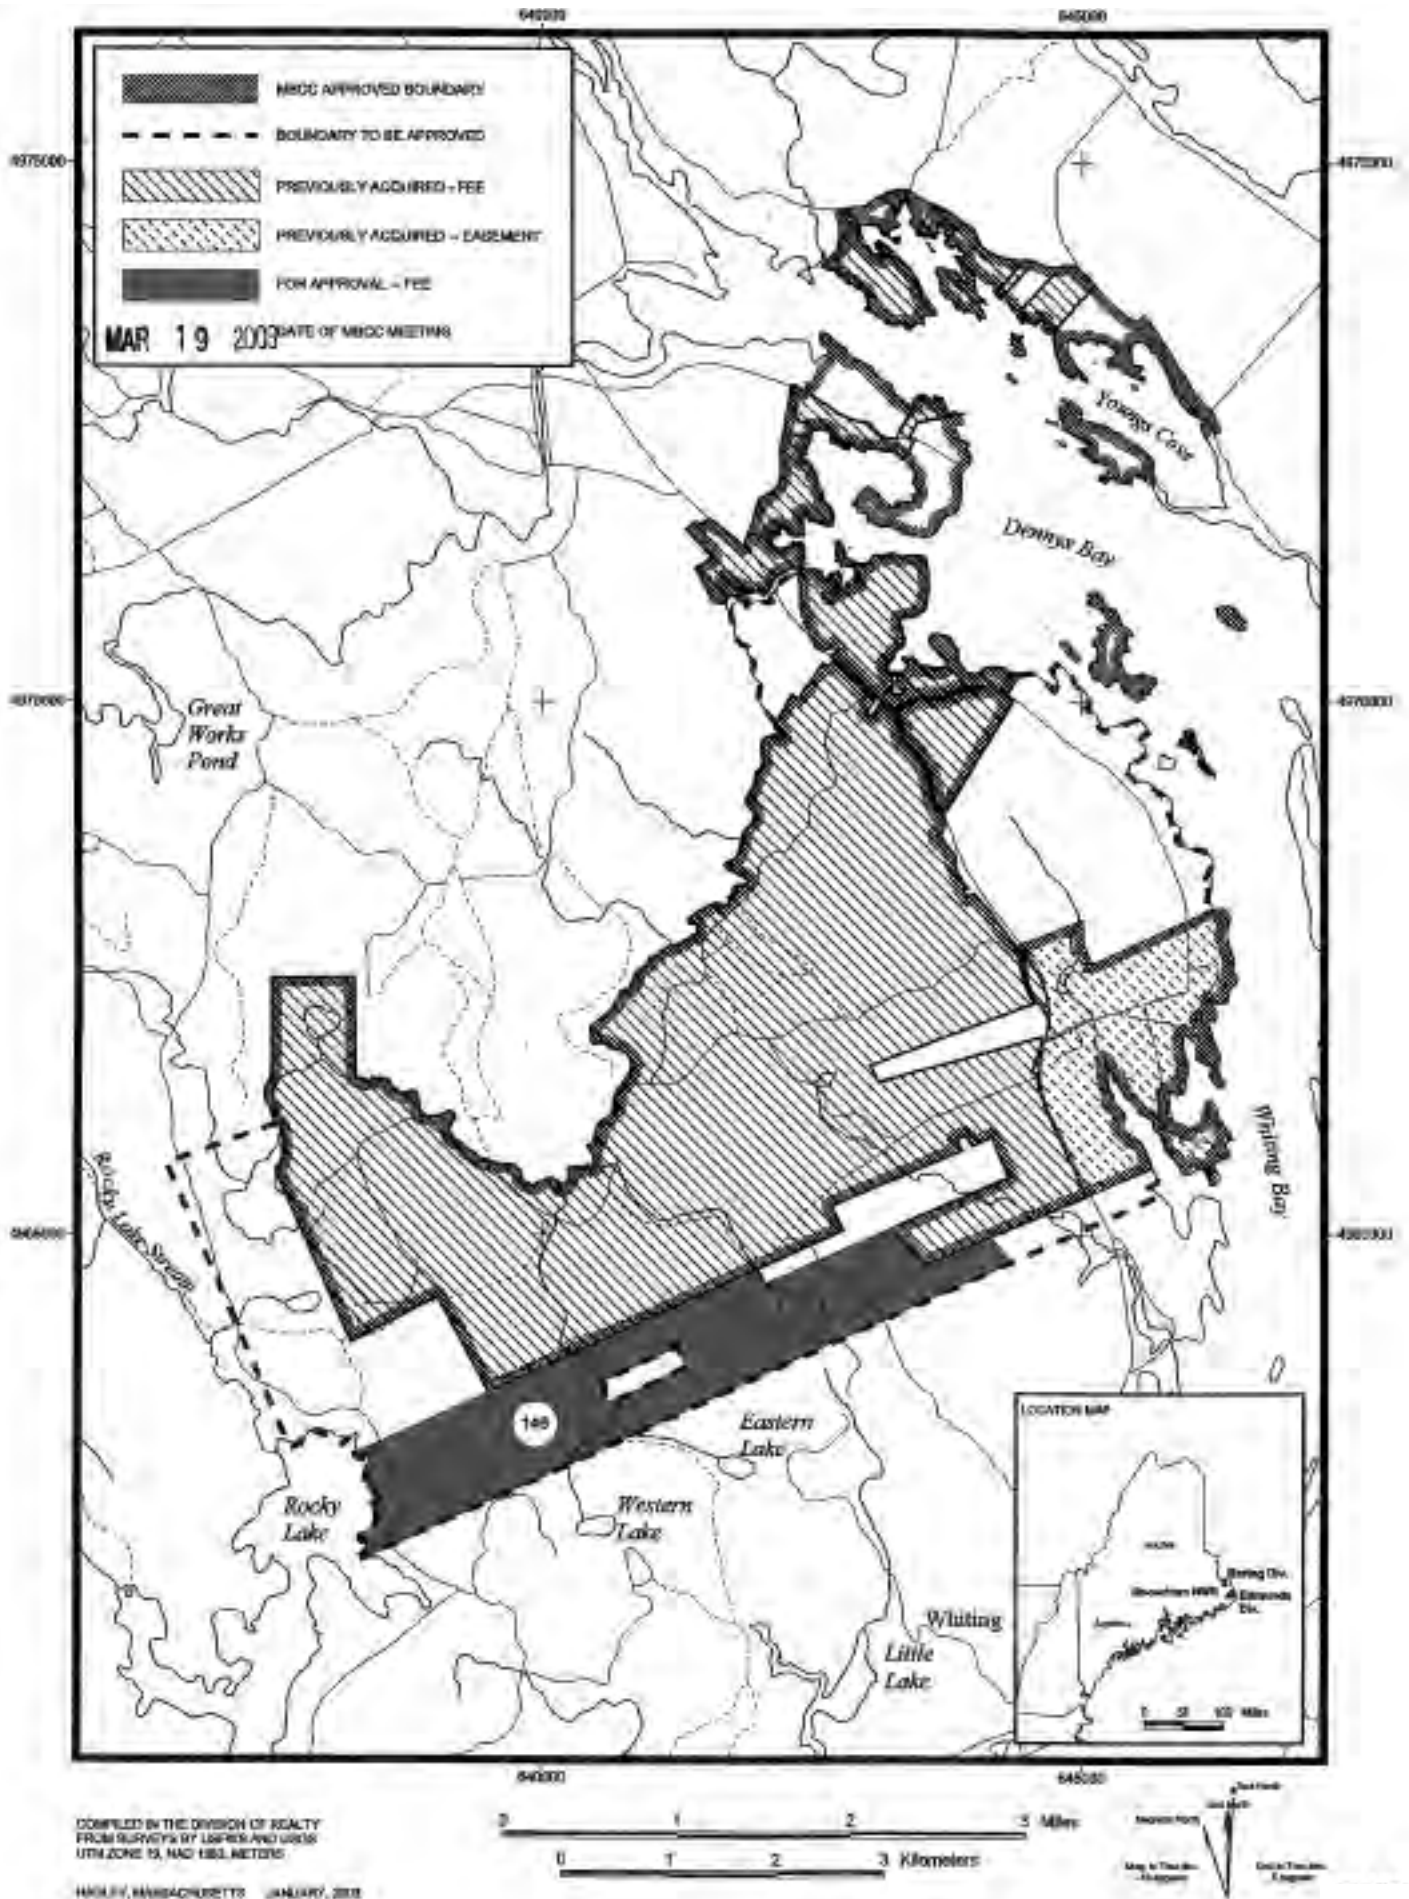

Moosehorn National Wildlife Refuge was established in 1936. It currently consists of two units: the Baring Unit acquired with the approval of the Migratory Bird Conservation Commission (January 14, 1936); and the Edmunds Unit comprising lands acquired by the Resettlement Administration and made a part of the refuge by Executive Order. The MBCC approved the Edmunds Unit on April 27, 1949. This refuge is located on the southeastern edge of Maine.

This property provides necessary breeding habitat, food, cover, travel corridors, and wintering habitat for the survival of those species of waterfowl that utilize the Atlantic Flyway. Cobscook Bay supports over 26% of the black ducks counted during Maine's winter inventory. It supports the highest nesting density of bald eagles in the northeastern United States, with several pairs in the Dennys Bay arm. This area is considered essential to the continuing recovery of this threatened species in the east. The property contains a variety of habitat types including forested areas and natural wetlands, including beaver flowages which provide excellent waterfowl habitat. Two streams also bisect the property and provide additional waterfowl nesting habitat.

The Commission approved the 3,426 acre refuge boundary addition and price approval for a 1,084 acre tract on March 19, 2003.

**Moosehorn National Wildlife Refuge**  
Washington County, Maine

**New National Wildlife  
Refuge Boundary Approvals (Cont.)**

**Blackwater National Wildlife Refuge**  
*Dorchester County, Maryland*

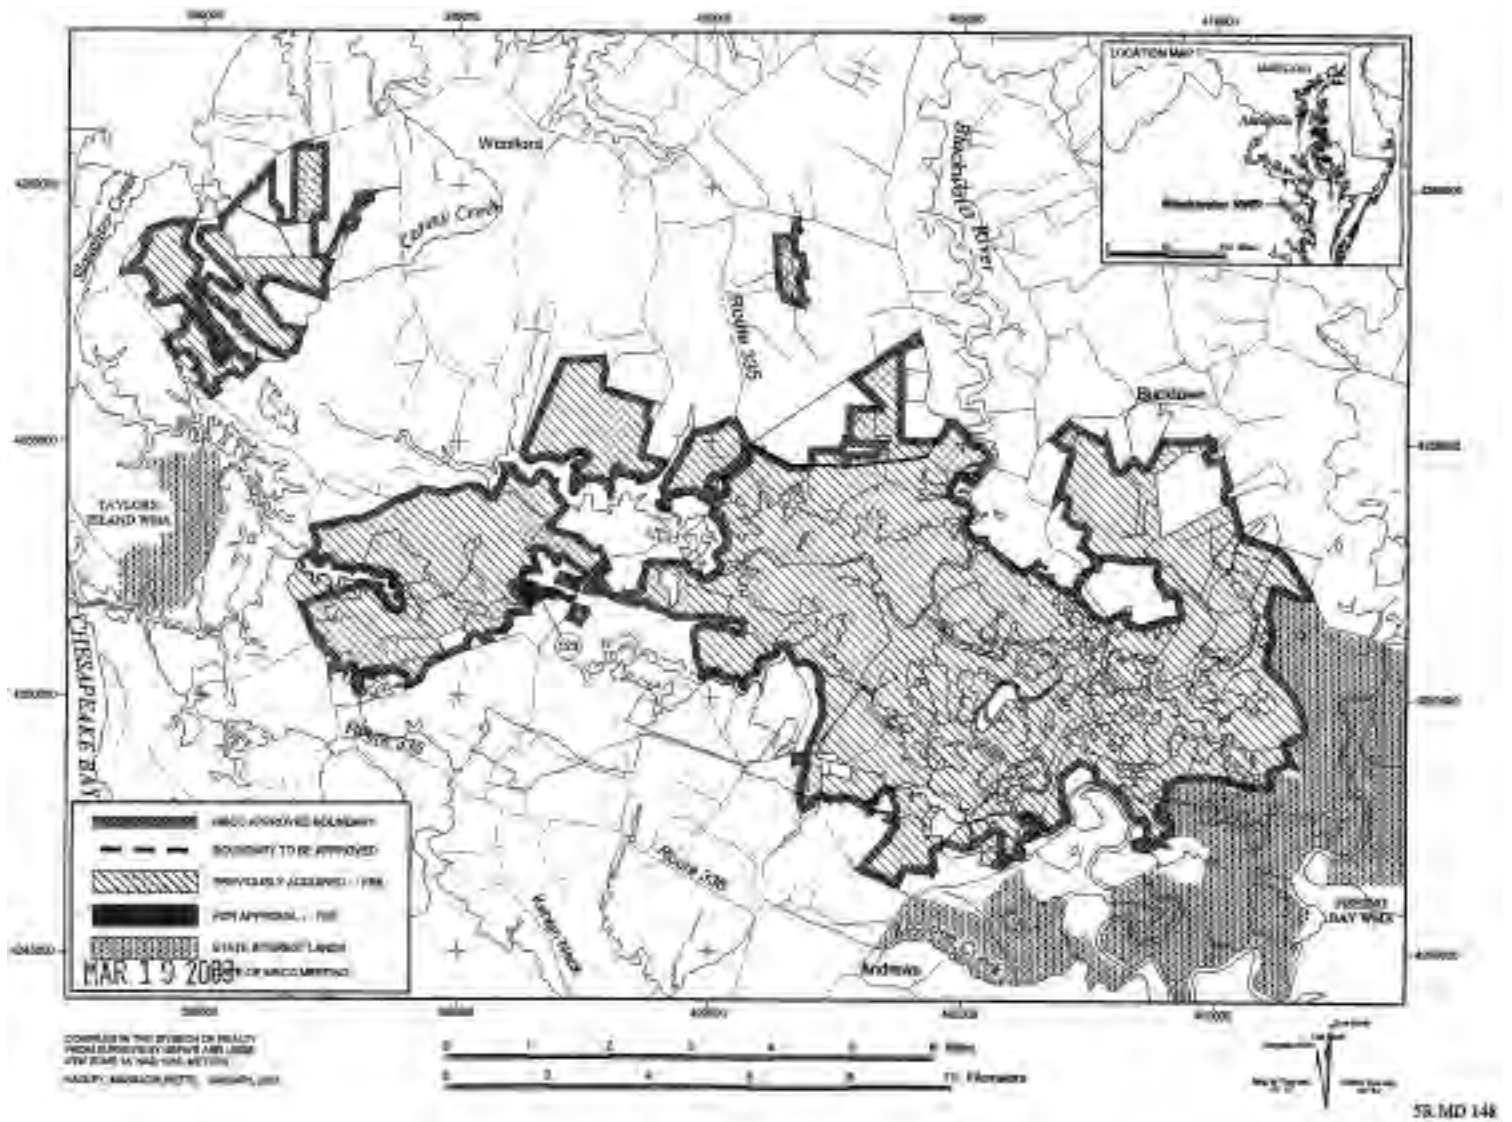

Blackwater National Wildlife Refuge was established in 1932 as a waterfowl sanctuary. Lands were subsequently added through purchases and donations. The refuge is located approximately 14 miles south of Cambridge, Maryland, in south central Dorchester County.

Timber harvesting and land clearing for agricultural use are reducing the available habitat and degrading preservation of the refuge. The boundary expansion will aid in the preservation of the refuge and protect the highly productive and ecologically diverse wetlands from major environmental alternation and degradation associated with the saltwater intrusion. Blackwater NWR and its adjacent marshes and waters are one of the Chesapeake Bay's most import and productive estuarine assets that support a wide diversity of aquatic and emergent plant communities. This aquatic vegetation provides optimum habitat for large concentrations of waterfowl. The area consists mostly of forested wetlands and mixed deciduous species. The woodlands remain flooded throughout the winter making soft and hard mast available for wintering waterfowl, such as mallards, black ducks, and wood ducks. Numerous species of other migratory birds, including the threatened bald eagle, songbirds, and webless waterbirds, utilize this area for nesting, roosting, and foraging.

The Commission approved the refuge boundary addition and price approval for an 89 acre tract on March 19, 2003.

## Blackwater National Wildlife Refuge

*Dorchester County, Maryland*

## New National Wildlife Refuge Boundary Approvals (Cont.)

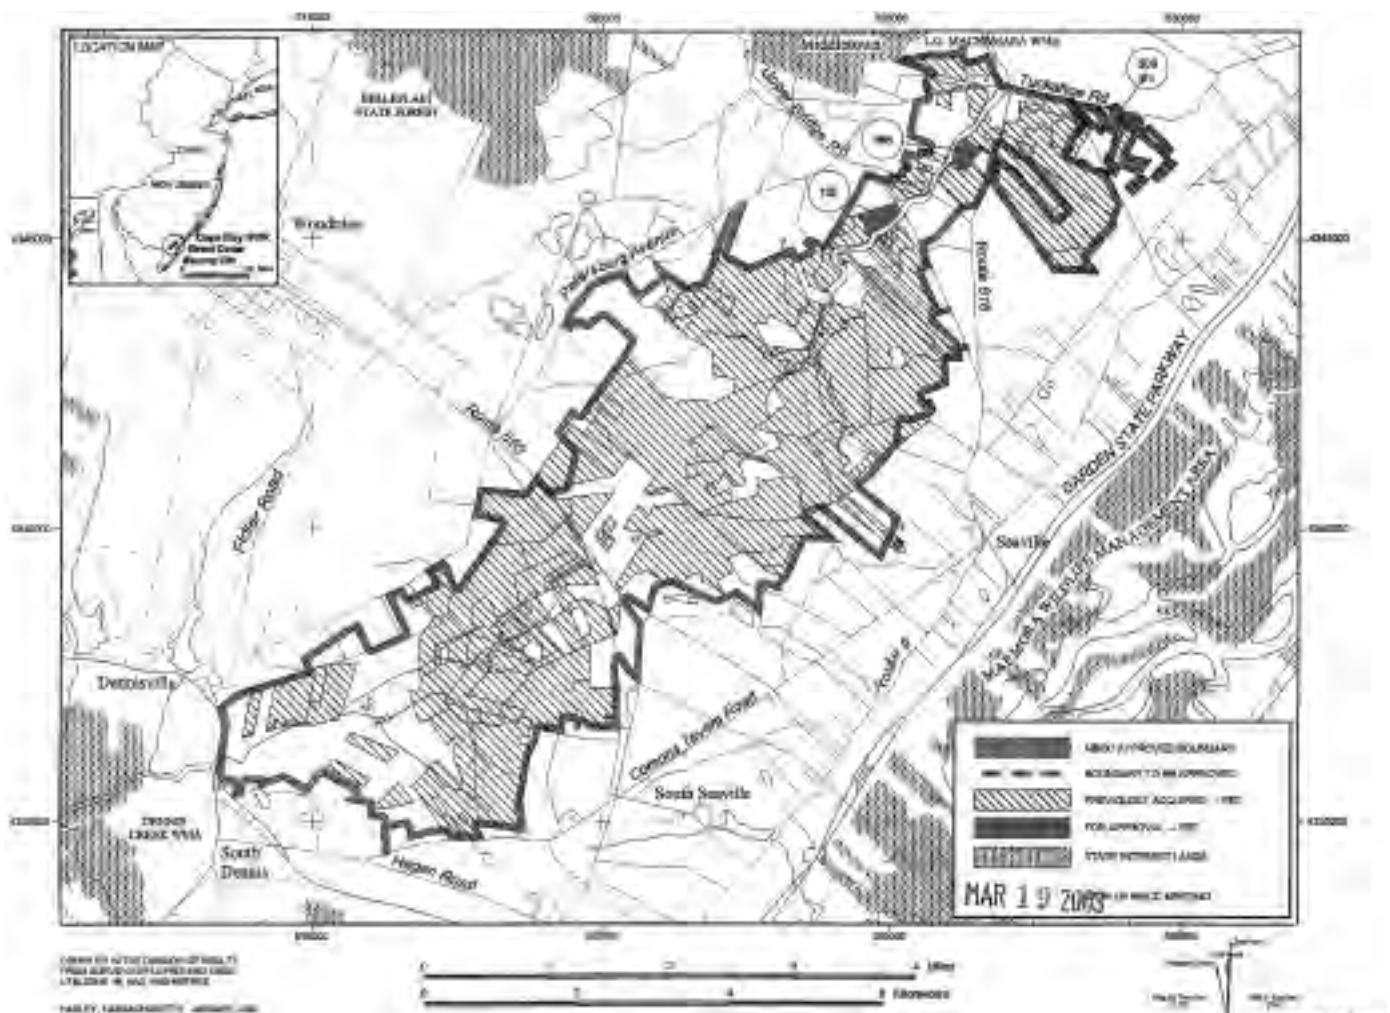

### Cape May National Wildlife Refuge *Cape May County, New Jersey*

Cape May National Wildlife Refuge was approved by the Migratory Bird Conservation Commission on May 9, 1989. Lands were subsequently added through purchases and a transfer from the Coast Guard. The refuge is located in southern New Jersey, approximately 30 miles southwest of Atlantic City, New Jersey. It is made up of two divisions. They are the Delaware Bay Division, along a stretch of Delaware Bay, and the Great Cedar Swamp Division.

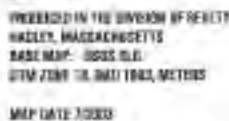

The coastal wetlands of New Jersey annually winter 30-40% of the Atlantic Flyway black duck population. The black

duck relies heavily on the area's small tidal and fresh water creeks because they remain ice-free during most of the winter season. This area also provides habitat for millions of other birds that are funneled through the Cape May peninsula during migrational periods. *Spartina* sp. salt marsh, wooded wetlands, and uplands habitat provide important habitat for ducks, neo-tropical migrants, and the American Woodcock.

The Commission approved the 71 acre refuge boundary addition and price approval for a 91.3 acre tract on March 19, 2003. The Commission also approved the 1,216 acre refuge boundary addition and price approval for a 12.59 acre tract on September 10, 2003.

*Cape May County, New Jersey*

**New National Wildlife  
Refuge Boundary Approvals (Cont.)**

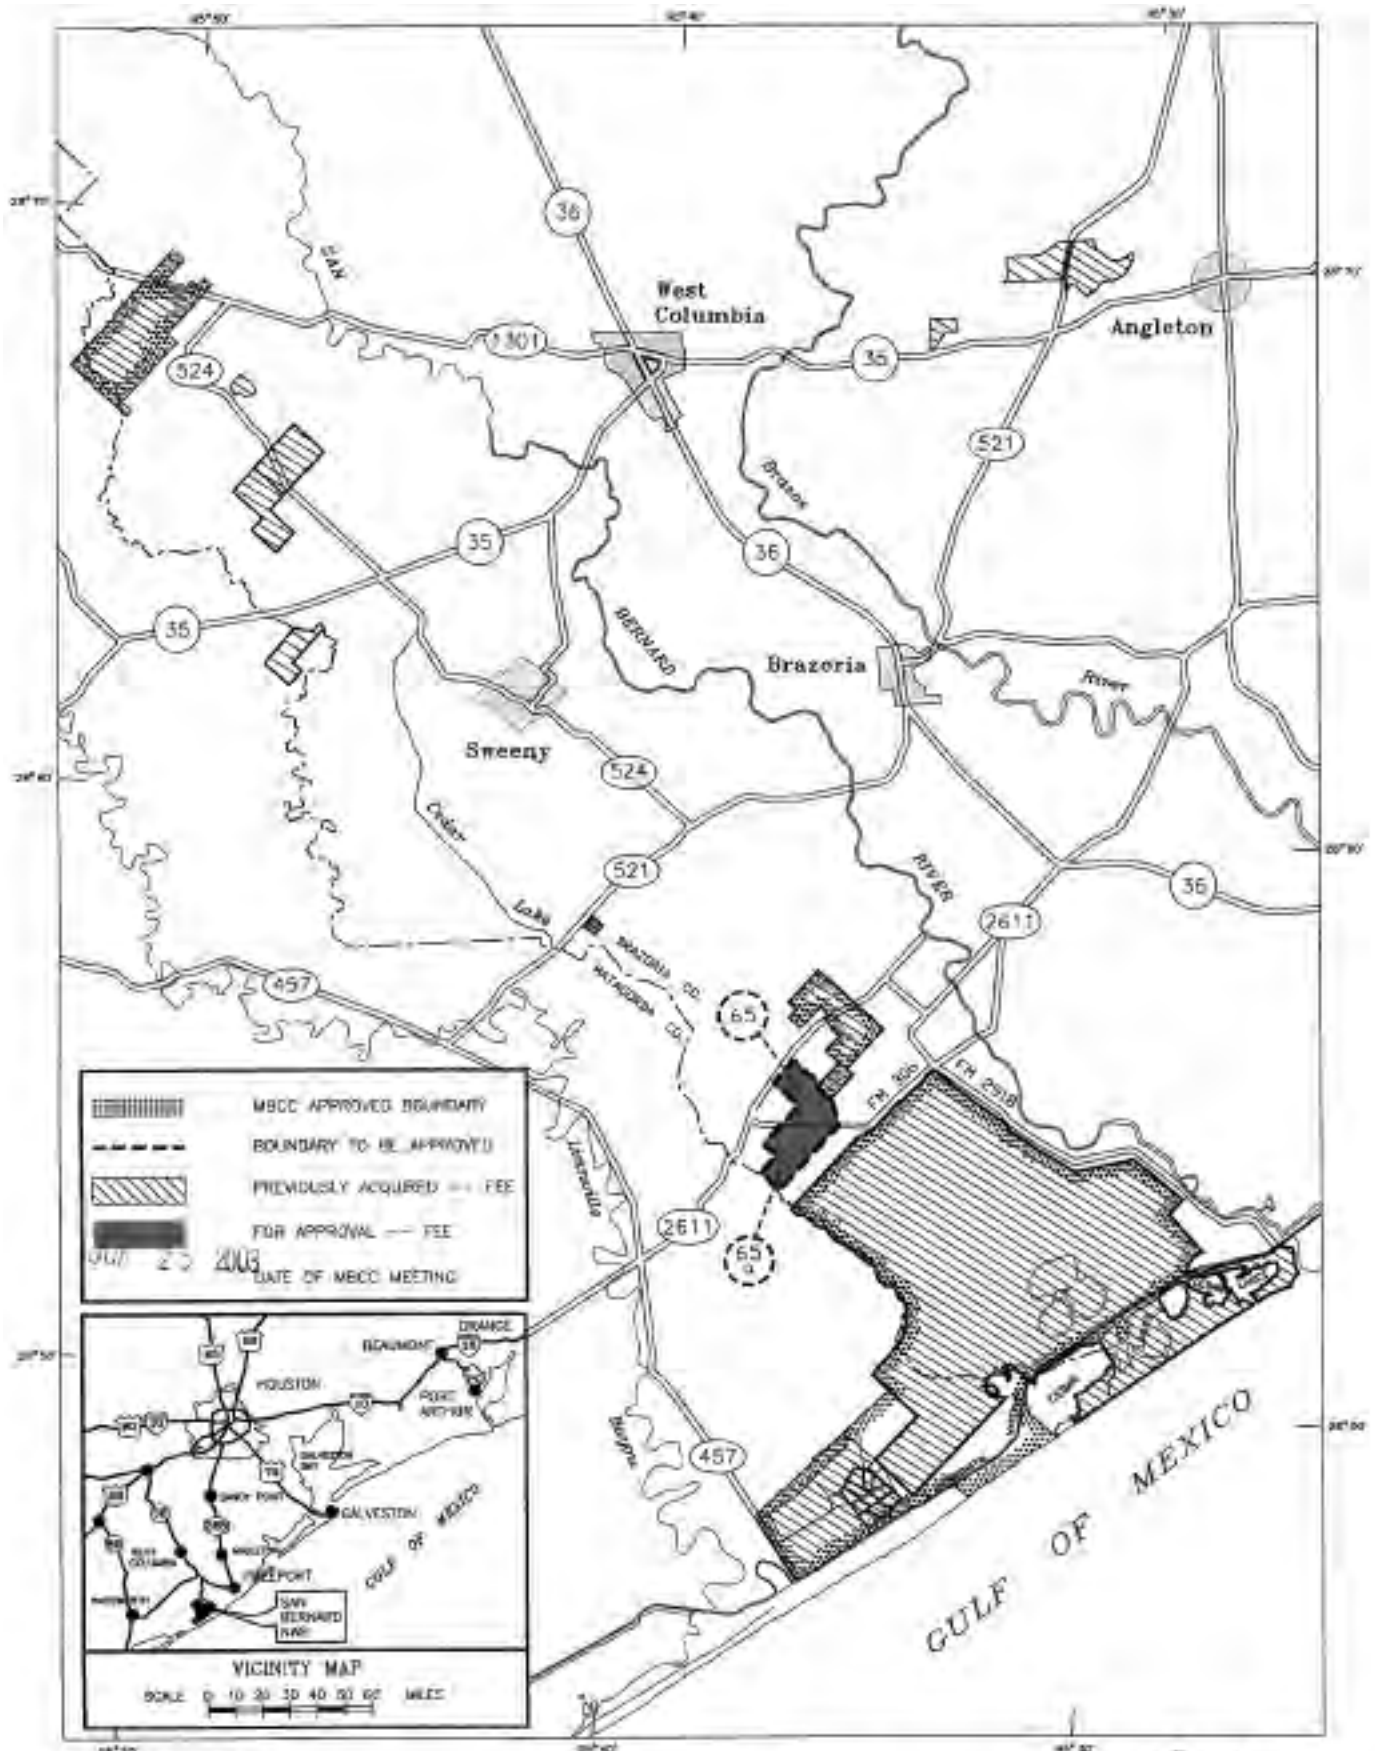

**San Bernard National Wildlife Refuge**  
*Brazoria County, Texas*

San Bernard National Wildlife Refuge was approved by the Migratory Bird Conservation Commission on February 27, 1968. Lands have been acquired through transfer from the Federal Deposit Insurance Corporation, donations, or purchased. The refuge is located in Brazoria County, Texas, about 70 miles south of Houston.

The area is part of a productive and valuable wetland complex providing wintering, migration, and resident habitat for waterfowl, wading birds, neo-tropical migratory birds, and other wetland-dependent wildlife species. Thousands of waterfowl winter in the area. Mottled ducks, a species of concern, use this area, as well as green-winged teal, gadwalls, and black bellied whistling ducks. This acquisition is within the Mid-Coast Initiative of the Gulf Coast Joint Venture of the North American Waterfowl Management Plan.

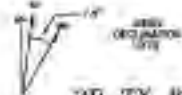

The Commission approved the refuge boundary addition and price approval for a 1,344.902 acre tract on June 25, 2003.

**New National Wildlife  
Refuge Boundary Approvals (Cont.)**

**Trinity River National Wildlife Refuge**

*Liberty County, Texas*

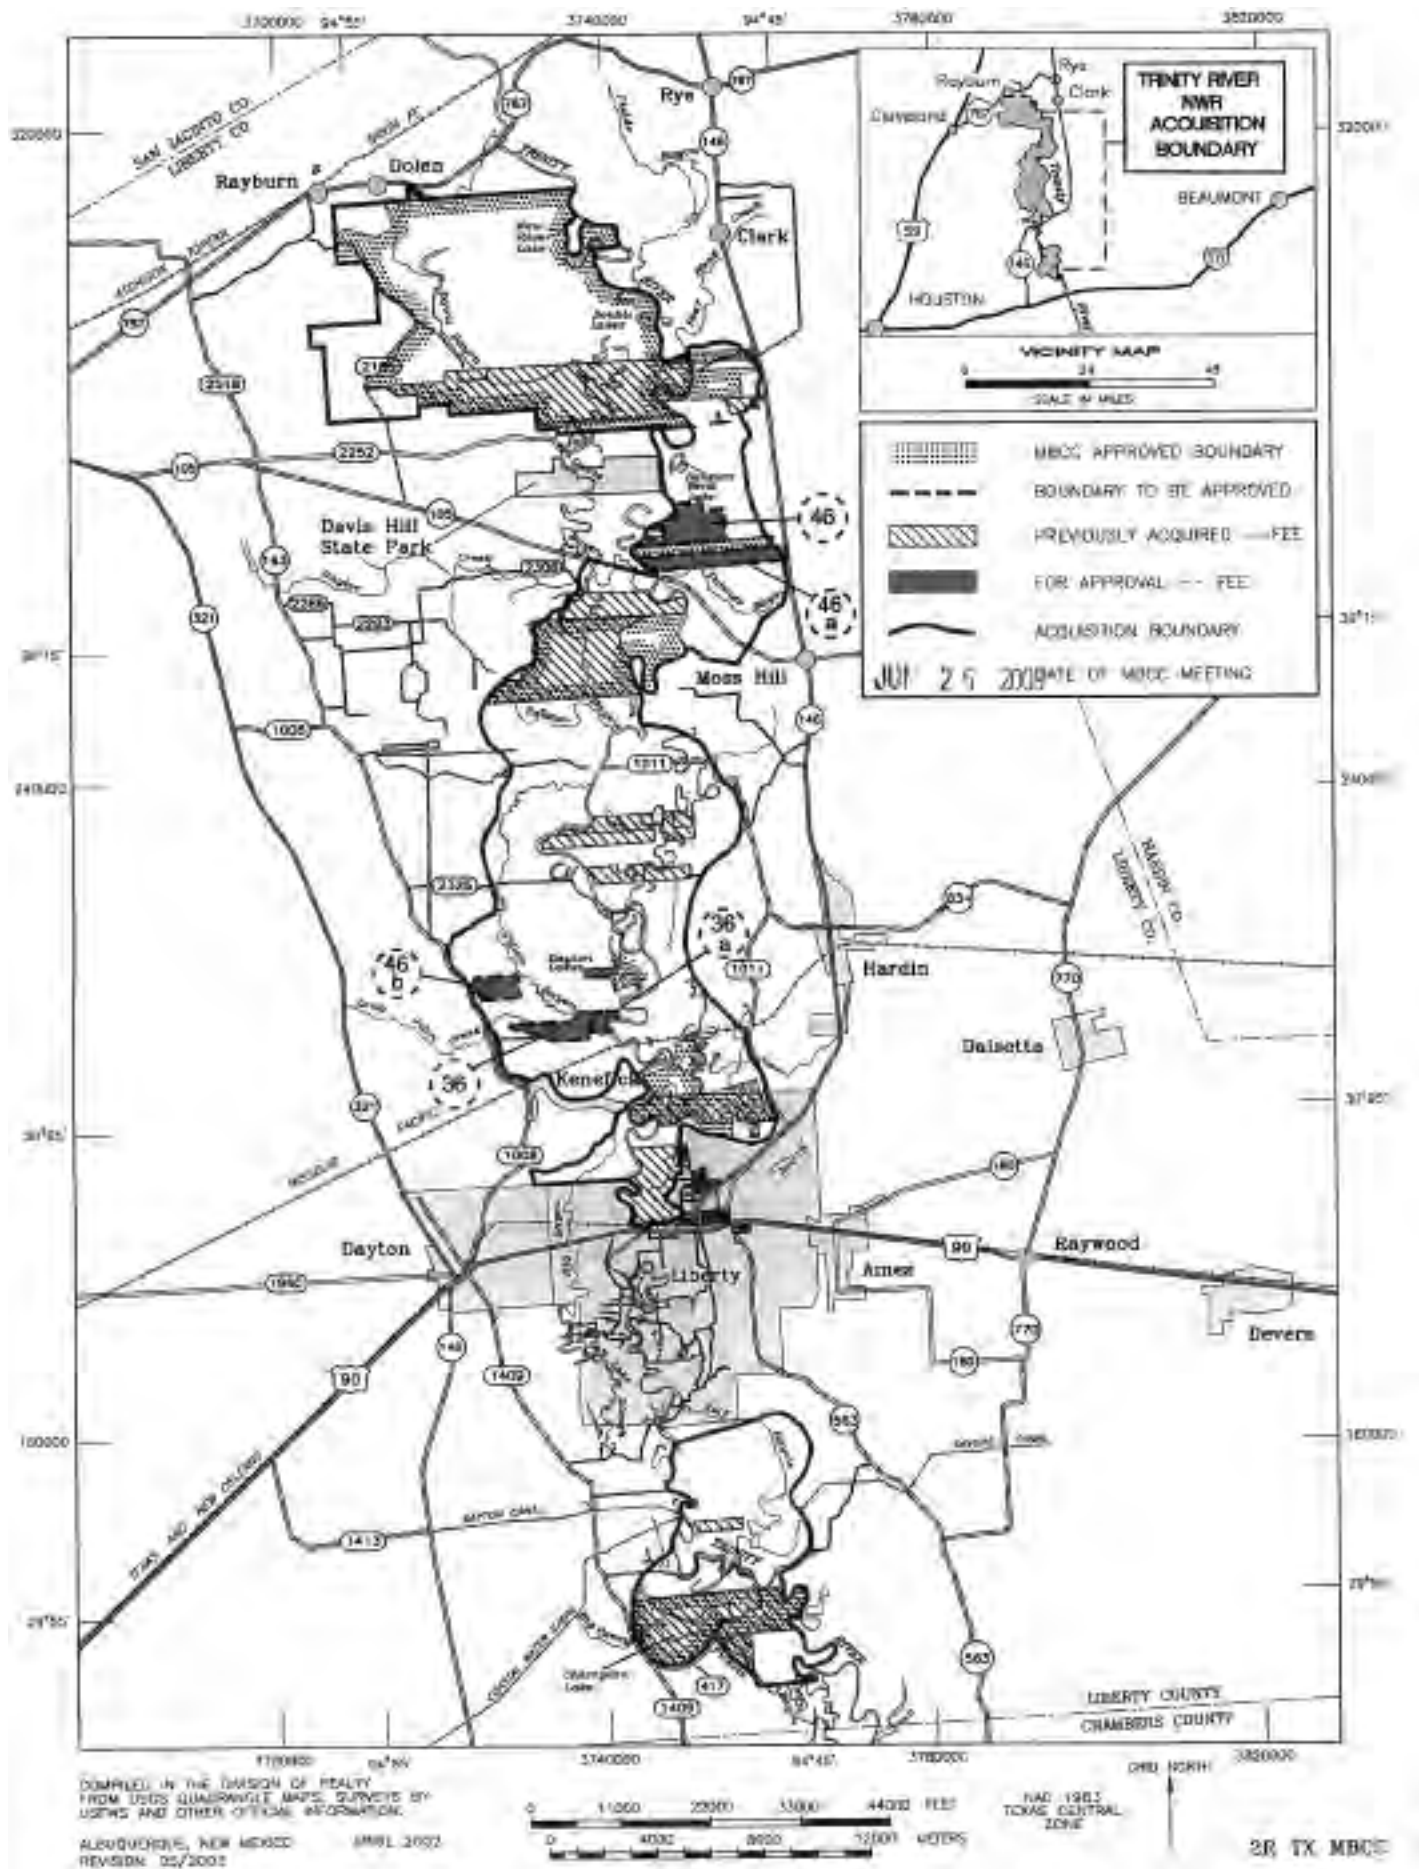

Trinity River National Wildlife Refuge was established on January 3, 1994. On June 14, 1994, the Migratory Bird Conservation Commission approved the initial MBCC boundary for the refuge. The refuge is located in Liberty County, Texas, about 45 miles northeast of Houston.

It was created to protect remnant bottomland hardwood forests and associated wetland habitats for migrating, wintering, and breeding waterfowl. It currently represents one of the few remaining high-quality areas for waterfowl in east Texas. The high variety of wetlands on the project area provide

important foraging and/or roosting habitat for the wood duck, mallard, gadwall, widgeon, green and blue-winged teal, lesser scaup, and mottled ducks. The mature cavity trees dispersed throughout the area also provide important nesting habitat for wood ducks and black-bellied whistling ducks. Large colonial waterbird rookeries are abundant in the many swamps, sloughs, and oxbow lakes found here. Trinity River NWR is a priority project for the East Texas Bottomland Hardwood Initiative, a component of the Lower Mississippi Valley Joint Venture and the North American Waterfowl Management Plan.

The Commission approved the refuge boundary addition and price approval for a 2,285.83 acre tract on June 25, 2003.

Trinity River National Wildlife Refuge  
Liberty County, Texas

**New National Wildlife  
Refuge Boundary Approvals (Cont.)**

**Turnbull National Wildlife Refuge**  
*Spokane County, Washington*

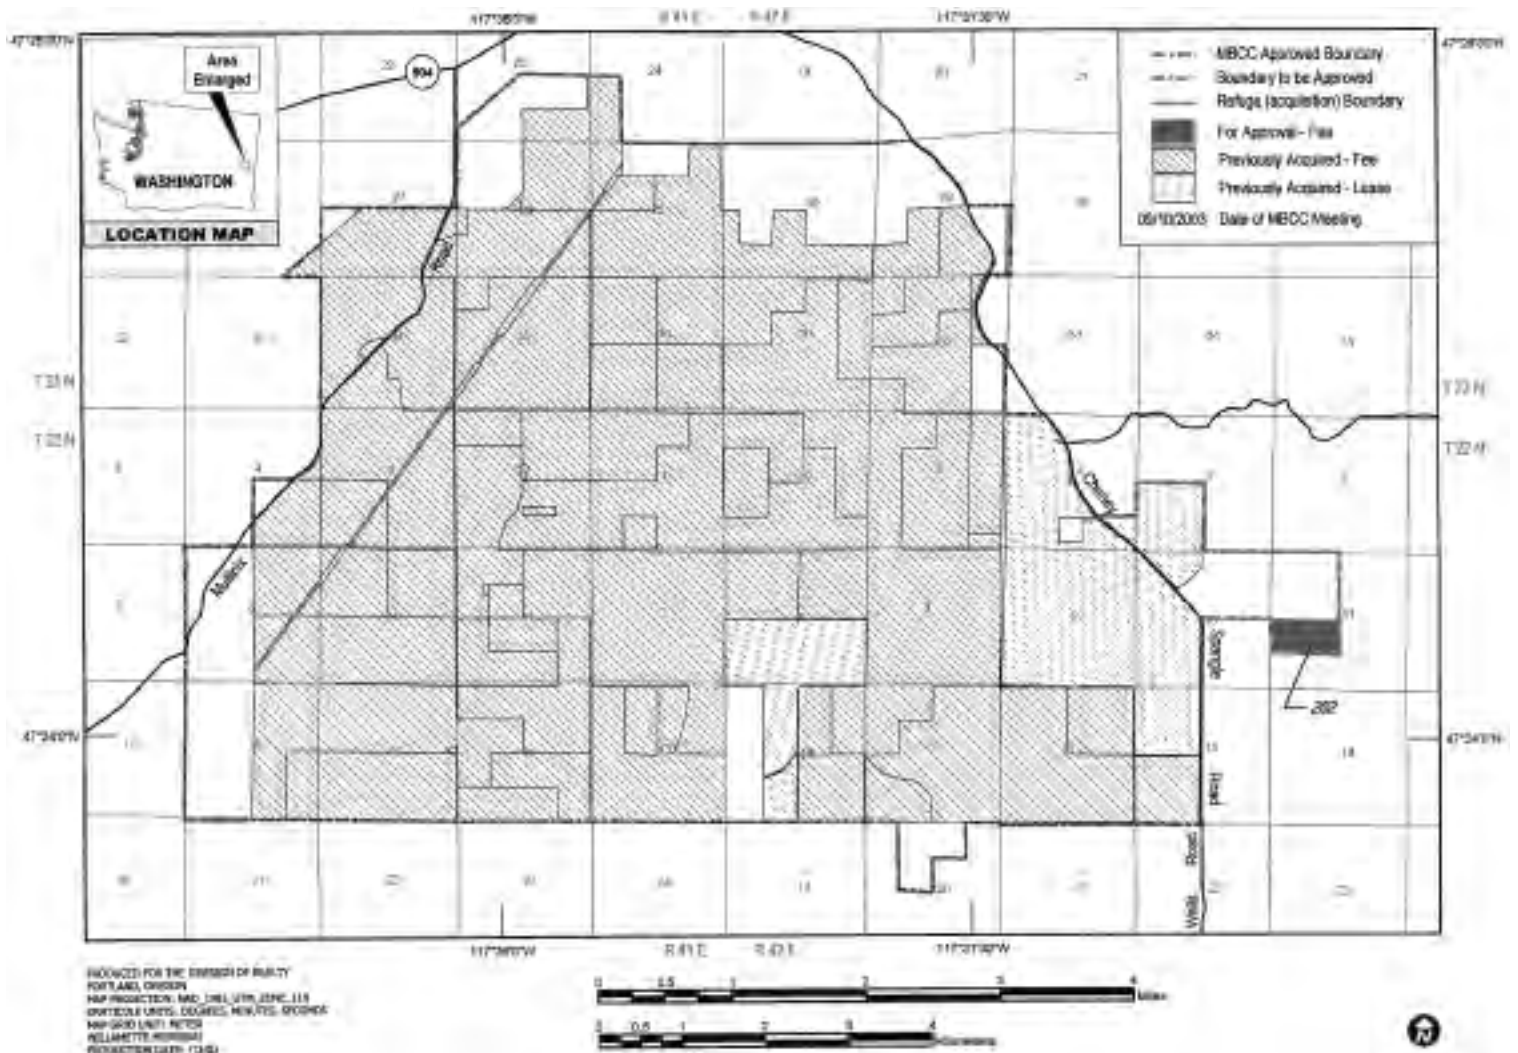

Turnbull National Wildlife Refuge was established on July 20, 1937, by Executive Order Number 7681. The Migratory Bird Conservation Commission approved the acquisition of the first tract on September 15, 1936. The Turnbull NWR is located in southwest Spokane County, 2 miles south of Cheney, Washington.

The primary purpose for its establishment was for a refuge and breeding ground for migratory birds, primarily diving ducks such as canvasback, redhead, and other wildlife. The refuge benefits waterfowl, wading birds, shore birds, neo-tropical migrants, threatened and endangered species, and other wildlife within the diverse landscape. Channeled scablands, depressional wetlands, lake frontage, and shrub-steppe habitats are portions of the refuge's ecosystem.

The Commission approved the 660 acre refuge boundary addition and price approval for a 80 acre tract on September 10, 2003.

**Turnbull National Wildlife Refuge**  
*Spokane County, Washington*

**New National Wildlife  
Refuge Boundary Approvals (Cont.)**

**Horicon National Wildlife Refuge**  
*Dodge County, Wisconsin*

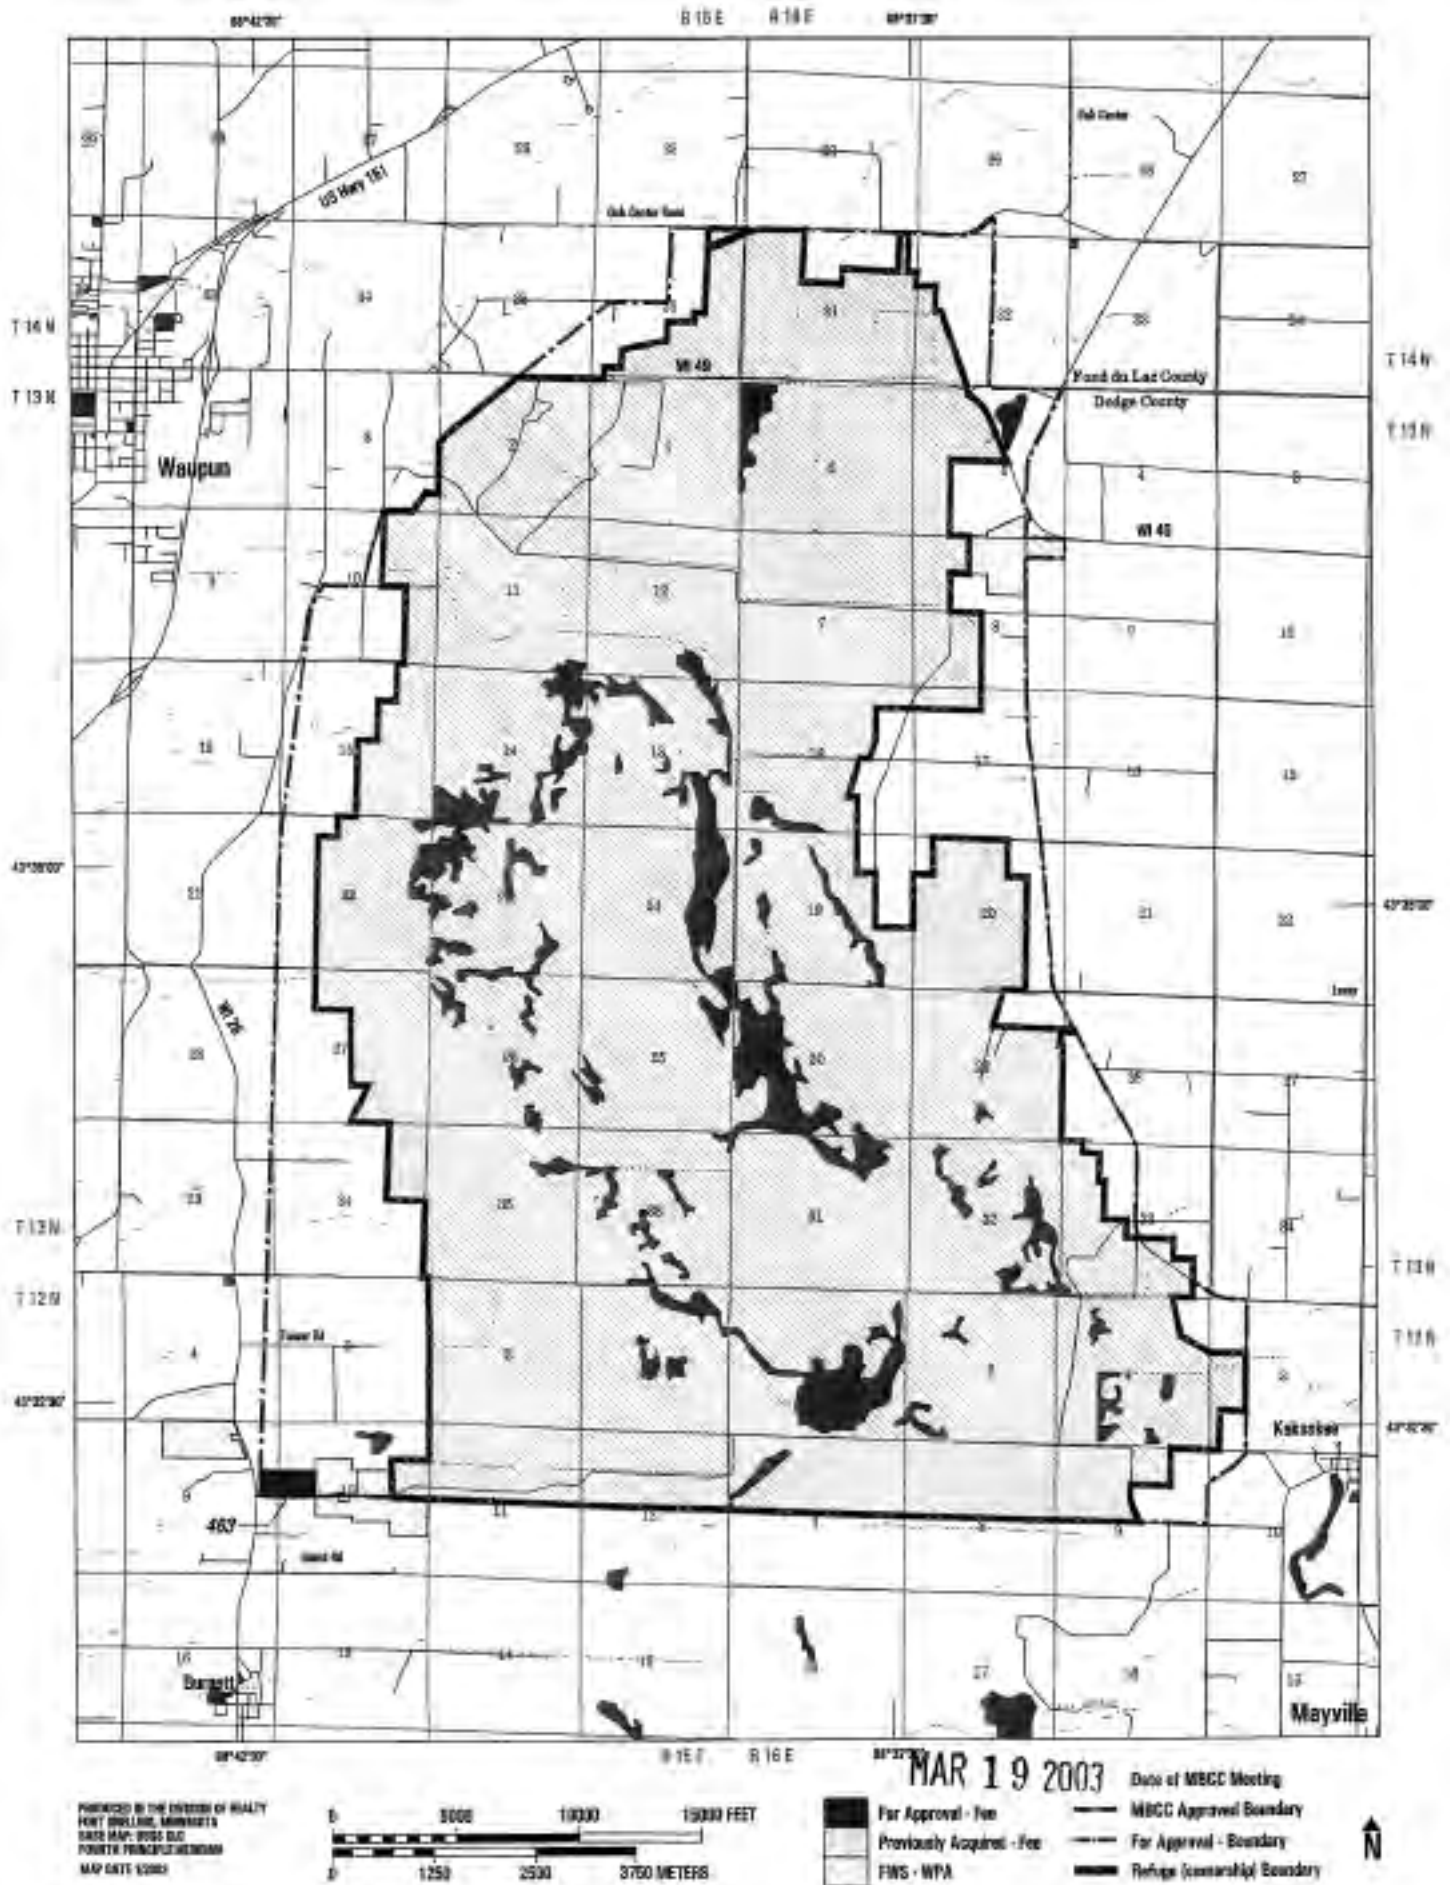

Horicon National Wildlife Refuge was established in 1941 under the authority of the Federal Migratory Bird Conservation Act of 1929. Horicon NWR is located in Dodge County, Wisconsin, 50 miles northeast of Madison.

The refuge is a major component of the Service's waterfowl refuge system in the Upper Mississippi Valley. Horicon Marsh is the largest freshwater cattail marsh in the United States, consisting of some 32,000 acres. It provides critically needed nesting cover, watershed protection for the refuge's marshes and lands needed for pool level control.

The Commission approved the 5,249 acre refuge boundary addition and price approval for a 40 acre tract on March 19, 2003.

# Waterfowl Production Areas

UNITED STATES  
Department of the Interior

UNITED STATES  
FISH AND WILDLIFE SERVICE

- COUNTIES IN WHICH SOME WETLANDS  
HAVE BEEN ACQUIRED OR LEASED**
- WETLANDS MANAGEMENT DISTRICT

Obtained in the Division of Wildlife  
Management, DE, SEPTEMBER 10, 1988

# Notes on Tables One and Two

The information contained in this report includes those acquisitions and dispositions of land and interests therein that are purchased with Migratory Bird Conservation Fund monies or acquired under the authority of the Migratory Bird Conservation Act. It also includes other migratory bird areas such as those that are transferred to the Fish and Wildlife Service under the authority of Public Law 80-537 to carry out a migratory bird management program (these will appear on Table 1).

In an ongoing effort to improve data quality, the figures in Tables One and Two may show minor changes from previous annual reports. Lands in which the Service previously acquired a less-than-fee interest (leases and easements) may be purchased in fee during the year, and

the number of easement or lease acres will show a decrease and the number of purchased acres an increase. The acreage appearing in the Approvals and Summary of Land Acquisitions sections of this report will not appear in Tables One or Two until after the tracts are acquired and the funds are actually expended. Also, a newly approved refuge will not appear on Table One until the tracts are acquired.

For information on all lands and interests under U.S. Fish and Wildlife Service control, refer to the “Annual Report of Lands Under Control of the U.S. Fish and Wildlife Service.” This report can be obtained from the U.S. Fish and Wildlife Service Division of Realty at <http://realty.fws.gov> or by calling (703) 358-1713.

# North American Wetlands Conservation Fund (Summary)

## Fiscal Year 2003

The Migratory Bird Conservation Commission approved 86 standard wetland conservation project proposals for funding in Fiscal Year 2003 under the North American Wetlands Conservation Act. A total of \$63,099,964 from the North American Wetlands Conservation Fund, together with

\$195,468,336 in partner funds, are supporting 39 projects in the United States, 30 in Canada, and 17 in Mexico. The following tables provide summary and detailed allocation information.

Fiscal Year 2003 Projects Approved by the Migratory Bird Conservation Commission and Active Under the North American Wetlands Conservation Act				
Country	Number of Projects	Act Funds	Partner Funds	Acres Affected
U.S.	39	\$36,762,148	\$159,328,140	362,926
Canada	30	\$23,704,034	\$32,732,898	1,118,217
Mexico	17	\$2,633,782	\$3,407,298	50,504
Total	86	\$63,099,964	\$195,468,336	1,531,647
